#### SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT MEMORANDUM

**DATE:** August 23, 1988  
**TO:** All Engineering Division Personnel  
**FROM:** William J. Dennison /s/ by WJD  
**SUBJECT:** Diesel Fuel Storage and Dispensing Equipment

According to Rule 219(m)(9), equipment used exclusively for organic liquid storage or transfer to and from storage, with a capacity of less than 251 gallons are exempt from written permit. Storage tanks with capacity greater than 251 gallons will require permits. Please follow these guidelines for the diesel fuel storage and dispensing equipment application.

1. If the diesel fuel storage and dispensing equipment is located at a facility that requires a Fuel Storage and Dispensing Permit, applicants shall use Form 450 to apply for a permit. The application filing fee shall be \$75 per application.
2. If the diesel fuel storage and dispensing equipment is located at a facility that does not require a Fuel Storage and Dispensing Permit, applicants shall also use Form 450 to apply for a permit and the application filing fee shall be \$ 75 per application. The application filing fee for gasoline fueling equipment in Rule 301.1(a)(3) shall be interpreted to include diesel fueling equipment.
3. If the facility has diesel fuel storage tank only and no dispensing equipment, the application filing fee shall be \$75 per application if the equipment is installed prior to June 3, 1988 and the application is filed before June 3, 1989. Otherwise, regular application filing fee will apply as described under Rule 301.1(a). Applicants shall use Form 400-A to apply for a permit. These applications will be processed by Rule 219 unit.

In order to accommodate the changes, modification had been made in the Rule 461 application form.
